

Limited Term Government and Agency Fund

Management Team

Christopher T. Harms
Cliff V. Rowe, CFA
Daniel T. Conklin, CFA

Objective

Seeks high current return consistent with preservation of capital

Benchmark

Bloomberg US 1-5 Year Government Bond Index

Highlights

- Focuses on securities that are issued or guaranteed by the US government or its agencies¹
- Emphasizes intermediate-term securities with a yield advantage and relative price stability
- Seeks securities that will provide the fund with an effective portfolio duration of 2 to 4 years
- Average credit quality of holdings is typically equal to the credit rating of the US government's long term debt

Institutional Class shares (Class Y) are available to institutional investors only; minimum initial investment of \$100,000.

As of the most recent prospectus, the investment advisor has contractually agreed to waive fees and/or reimburse expenses (with certain exceptions) once the expense limitation of the fund has been exceeded. This arrangement is set to expire on 1/31/25. When an expense limitation has not been exceeded, the fund may have similar expense ratios and/or yields.

Duration and Maturity for equity securities are deemed to be zero.

About Risk

Fixed income securities may carry one or more of the following risks: credit, interest rate (as interest rates rise bond prices usually fall), inflation and liquidity. **US government agency securities** are not insured and may not be guaranteed by the US government. **Mortgage-related and asset-backed securities** are subject to the risks of the mortgages and assets underlying the securities. Other related risks include prepayment risk, which is the risk that the securities may be prepaid, potentially resulting in the reinvestment of the prepaid amounts into securities with lower yields. **Securities purchased on a forward commitment, when-issued or delayed delivery basis** are subject to many of the same risks (such as market risk and interest rate risk) as other securities. In addition, when-issued and delayed delivery securities are subject to other risks including loss of value prior to delivery; the security may not be issued; or a counterparty to the transaction may not meet its obligations.

Portfolio composition statistics are from the adviser's internal system and may not match the fund's regulatory documents. Due to rounding, **Sector, Currency, Country, Quality, Duration and Maturity** totals may not equal 100%. This portfolio is actively managed and characteristics are subject to change. **Credit Quality** reflects the highest credit rating assigned to individual holdings of the fund among Moody's, S&P or Fitch; ratings are subject to change. The fund's shares are not rated by any rating agency and no credit rating for fund shares is implied. Bond credit ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). **Cash & Equivalents** may include unsettled trades, fees and/or derivatives. **ABS/RMBS:** Asset-Backed Securities/Residential Mortgage-Backed Securities. **Agency MBS:** Agency Mortgage-Backed Securities. **CMBS:** Commercial Mortgage-Backed Securities.

The 30-day SEC yield is a standardized calculation, calculated by dividing the net investment income per share for the 30-day period by the maximum offering price per share at the end of the period and annualizing the result. Treasury Inflation-Protected Securities (TIPS) are designed to provide protection against inflation through monthly adjustments to the principal value of TIPS, which increases with inflation and decreases with deflation as measured by the Consumer Price Index. Monthly principal adjustments for inflation (increases and

decreases) are excluded from the 30-day SEC yield calculation. Such adjustments can vary substantially from one month to the next, and if they were included, may materially impact the 30-day SEC yield either higher or lower. A subsidized 30-day SEC yield reflects the effect of fee waivers and expense reimbursements. The SEC yield is not based upon distributions of the fund and actual income distributions may be higher or lower than the 30-day SEC yield amounts. During periods of unusual market conditions and/or activity in the sales or redemptions of fund shares, the fund's 30-day SEC yield amounts may be materially higher or lower than its actual income distributions. Unsubsidized 30-day SEC yield is calculated using the gross expenses of the fund. Gross expenses do not include any fee waivers or reimbursement.
