HIGHLIGHTS

- Multi asset credit (MAC) strategy that seeks to capture credit risk premiums in markets that we believe can offer strong risk-adjusted return potential over a full market cycle
- Asset allocation determined by evaluating the current stage of the global credit cycle and the attractiveness of the various sectors
- Top-down analysis driven by real-time market data, economic releases, and market technicals, coupled with our quantitative models
- Bottom-up analysis is driven by the portfolio management team’s daily interaction with sector teams and the insights the teams generate
