The Bloomberg US Corporate High Yield Index covers the universe of fixed rate, non-investment grade debt. Eurobonds and debt issues from countries designated as emerging markets (sovereign rating of Baa1/BBB+/BBB+ and below using the middle of Moody's, S&P, and Fitch) are excluded, but Canadian and global bonds (SEC registered) of issuers in non-EMG countries are included. Original issue zeroes, step-up coupon structures, 144-As and pay-in-kind bonds (PIKs, as of October 1, 2009) are also included. Indices are unmanaged. It is not possible to invest directly in an index.

The Fund's composition statistics are from the adviser's internal system and may not match the fund's regulatory documents. Due to rounding, **Sector**, **Currency**, **Country**, **Quality**, **Duration** and **Maturity** totals may not equal 100%. This Fund is actively managed and characteristics are subject to change. **Credit Quality** reflects the highest credit rating assigned to individual holdings of the fund among Moody's, S&P or Fitch; ratings are subject to change. The fund's shares are not rated by any rating agency and no credit rating for fund shares is implied. Bond credit ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). **Cash & Equivalents** may include unsettled trades, fees and/or derivatives. **ABS/RMBS**: Asset-Backed Securities/Residential Mortgage-Backed Securities. **Agency MBS**: Agency Mortgage-Backed Securities. **CMBS**: Commercial Mortgage-Backed Securities.

The 30-day SEC yield is a standardized calculation, calculated by dividing the net investment income per share for the 30-day period by the maximum offering price per share at the end of the period and annualizing the result. Treasury Inflation-Protected Securities (TIPS) are designed to provide protection against inflation through monthly adjustments to the principal value of TIPS, which increases with inflation and decreases with deflation as measured by the Consumer Price Index. Monthly principal adjustments for inflation (increases and decreases) are excluded from the 30-day SEC yield calculation. Such adjustments can vary

substantially from one month to the next, and if they were included, may materially impact the 30-day SEC yield either higher or lower. A subsidized 30-day SEC yield reflects the effect of fee waivers and expense reimbursements. The SEC yield is not based upon distributions of the fund and actual income distributions may be higher or lower than the 30-day SEC yield amounts. During periods of unusual market conditions and/or activity in the sales or redemptions of fund shares, the fund's 30-day SEC yield amounts may be materially higher or lower than its actual income distributions.

Unsubsidized 30-day SEC yield is calculated using the gross expenses of the fund. Gross expenses do not include any fee waivers or reimbursement.

Before investing, consider the fund's investment objectives, risks, charges, and expenses. Please visit

[www.loomissayles.com](http://www.loomissayles.com) or call 800-633-3330 for a prospectus and a summary prospectus, containing this and other information. Read it carefully.

Natixis Distribution, LLC (fund distributor, member FINRA|SIPC) and Loomis, Sayles & Company, L.P. are affiliated.

## About Risk

**Below investment grade fixed income securities** may be subject to greater risks (including the risk of default) than other fixed income securities. **Fixed income securities** may carry one or more of the following risks: credit, interest rate (as interest rates rise bond prices usually fall), inflation and liquidity. **Foreign and emerging market securities** may be subject to greater political, economic, environmental, credit, currency and information risks. Foreign securities may be subject to higher volatility than US securities due to varying degrees of regulation and limited liquidity. These risks are magnified in emerging markets. **Currency** exchange rates between the US dollar and foreign currencies may cause the value of the fund's investments to decline. **Derivatives** involve risk of loss and may entail additional risks. Because derivatives depend on the performance of an underlying asset, they can be highly volatile and are subject to market and credit risks.

**Diversification does not ensure a profit or guarantee against a loss.**

**Any investment that has the possibility of profits also has the possibility of**
